

ABSTRACT

The present invention relates to the use of one or more of the compounds of the
5 group consisting of 4-thiouridine, isomaltitol, and uridine in the preparation of
therapeutically effective compositions against acute or chronic inflammations, and/or
problems in hemostasis related to platelet function, as well as a method for treatment of
acute or chronic inflammations, and/or problems in hemostasis related to platelet function
with the exception of the use of uridine in the treatment of inflammatory conditions
10 caused by a bacterial infection.
